in this book we are responding to numerous requests for a more recent and rather more detailed treatment of the subject the first edition was accorded an excellent reception but the books 1 to 5 were written twelve years ago and inevitably there have been advances on many fronts since then

caring for and taking care of animals is one of the hobbies that humans have been practicing for generations people and mammals have lived together over the years some of these mammals have been domesticated as truly beneficial to mankind through its utilization in day to day circumstances and performance of the tasks and functions needed by the human race others have been domesticated for their meat milk and even skins and wool for human consumption however many other species remained wild and could not be domesticated by humans they are still seen in forests reserves and zoos the attached atlas covers the many varieties of mammals under those couple groups comprehensively in accordance with commonly accepted classifications it tries at the same time in a professional manner to provide appropriate examples of each type of animal including photographs distinctive

illustrations of these different species according to their classification it is an atlas that genuinely covers the world of mammals

this vintage text offers insights into the practice of the taxidermy of mammal heads and was originally published as part of a series covering a broad range of taxidermy subjects written by various experts each volume features a brief history of the practice and is extensively illustrated with instructional diagrams and photographs throughout

this fascinating edition focuses on the preparation skinning and mounting of mammal heads and would be of interest to the taxidermy amateur enthusiast and professional alike the contents of volume seven include taxidermy history skinning the game head preparing and mounting a deer head mounting horns and antlers polishing and mounting horns mounting mammal heads as trophies and ornaments making artificial heads and rockwood in paper facial expression and mouth modelling we are republishing this classic work in a high quality modern and affordable edition featuring reproductions of the original artwork and a newly written introduction

this volume brings together a series of papers that address the topic of reconstructing behavior in the primate fossil record the literature devoted to reconstructing behavior in extinct species is overwhelming and very diverse sometimes it seems as though behavioral reconstruction is done as an afterthought in the discussion section of papers relegated to the status of informed speculation but recent years have seen an explosion in studies of adaptation functional anatomy comparative sociobiology and development powerful new comparative methods are now available on the internet at the same time we face a rapidly growing fossil record that offers more and more information on the morphology and paleoenvironments of extinct species consequently inferences of behavior in extinct species have become better grounded in comparative studies of living species and are becoming increasingly rigorous we offer here a series of papers that review broad issues related to reconstructing various aspects of behavior from very different types of evidence we hope that in so doing the reader will gain a perspective on the various types of evidence that can be brought to bear on reconstructing behavior the strengths and weaknesses of different approaches and perhaps new approaches to the topic we define behavior as broadly as we can including life history traits locomotion diet and social behavior giving the authors considerable freedom in choosing what exactly they wish to explore
